

# APPLIED MATHEMATICS AND MECHANICS

Vol.43 2022

## INDEX

<b>LIU Xiaojing, ZHOU Youhe and WANG Jizeng</b> Research Progresses of Wavelet Methods and Their Applications in Mechanics	1( 1 )
<b>SUN Wenjing and WANG Yize</b> Active Control on Band Gap Properties and Interface Transmission of Elastic Waves in Piezoelectric Metamaterial Beams	1( 14 )
<b>JIANG Ruisong, XU Mengbo, ZHANG Fan, HU Weipeng and DENG Zichen</b> Structure-Preserving Layout Optimization of Precision Devices in Spacecraft	1( 26 )
<b>LI Jiayu, CHEN Mengcheng and WANG Kaixin</b> Nonlinear Numerical Simulation of Finite Elements Based on Fiber Beam Elements With Shear Effects for Structures	1( 34 )
<b>WANG Jincheng, GUAN Hui, WEI Zhijun and WU Chuijie</b> Numerical Analysis on Effects of Wall Structures on Bubble Groups	1( 49 )
<b>LIANG Jia, GAO Ming, CHEN Lu, WANG Dongmin, WANG Zhiyun and ZHANG Lixin</b> Study on Droplets Impacting on Orifice Plates With Different Wettabilities Based on the Lattice Boltzmann Method	1( 63 )
<b>WANG Muchen, LI Lizhou, ZHANG Jun, HUANG Yuqi, ZHANG Lin and SHI Yue</b> An Airfoil Optimization Method Based on the Convolutional Neural Network Aerodynamic Reduced Order Model	1( 77 )
<b>YANG Jing, TAN Wenhui and WEI Zhouchao</b> Invariant Algebraic Surfaces of the Vallis System	1( 84 )
<b>ZHAO Wei and REN Fengli</b> Finite Time Adaptive Synchronization of Quaternion-Value Neural Networks With Time Delays	1( 94 )
<b>MA Lixin, LIU Chen and LIU Lei</b> Optimal Leader-Following Consensus Control of Fractional-Order Multi-Agent Systems Based on the Actor-Critic Algorithm	1( 104 )
<b>SHI Jincheng</b> Spatial Decay Estimates for a Class of Thermoelastic Plates	1( 115 )
<b>TANG Yingzhuo, LU Guangyu and CAI Guoping</b> Active Vibration Control of Truss Structures for Large Space Telescopes Based on Cable Actuators	2( 123 )
<b>LU Zeyang, LI Shujiang and WANG Xiangdong</b> Asymptotic Tracking Control on Profiling Posture of Sprayer Boom Systems With Position Uncertainties	2( 132 )
<b>YANG Yujiao, XU Huidong and ZHANG Jianwen</b> Anti-Controlling Codimension-2 Bifurcation of Discrete Dynamical Systems in 1 : 2 Resonance	2( 142 )
<b>GUAN Yuming and GE Xinsheng</b> Dynamic Modeling and Analysis of the Central Rigid Body-Timoshenko Beam Model Based on Unconstrained Modes	2( 156 )

<b>ZHANG Bo, SHI Tianzi, ZHANG Yilin, SUN Dongsheng, YUAN Congmin, DING Hu and CHEN Liquan</b> Theoretical Analysis on Dynamic Stability of Rotating Pipes Conveying Fluid	2( 166 )
<b>ZHENG Supei, LI Xiao, ZHAO Qingyu and FENG Jianhu</b> A Rotated Mixed Scheme for Solving 2D Shallow Water Equations	2( 176 )
<b>WEI Jianying and GE Yongbin</b> A High-Order Finite Difference Scheme for 3D Unsteady Convection Diffusion Reaction Equations	2( 187 )
<b>CAO Juan and REN Fengli</b> Mean-Square Synchronization and Stochastically Passive Synchronization of Delayed Gene Regulatory Networks With Markovian Switching	2( 198 )
<b>ZHOU Jun, ZHANG Jian and YANG Shunfeng</b> Stochastic Modeling and Convergence Analysis of Internet Routers	2( 207 )
<b>WU Di and LI Xiaolin</b> An Element-Free Galerkin Method for Time-Fractional Diffusion-Wave Equations	2( 215 )
<b>WANG Yahui</b> A 3rd-Order Modified Stencil WENO Scheme for Solution of Hyperbolic Conservation Law Equations	2( 224 )
<b>PAN Junjie, LIU Huanwen and LI Changjiang</b> Bragg Resonance and Phase Upshift of Linear Water Waves Excited by a Finite Periodic Array of Parabolic Trenches	3( 237 )
<b>LIU Hao, LOU Qin and HUANG Yifan</b> Study of Movement Mechanisms of Droplets in Power-Law Fluids in T-Junction Microchannels With the Lattice Boltzmann Method	3( 255 )
<b>BAI Yu, FANG Huiling and ZHANG Yan</b> Unsteady Slip Flow and Heat Transfer Analysis of Oldroyd-B Fluid Over the Stretching Wedge	3( 272 )
<b>SUN Qiang, PENG Dongsheng, ZHANG Yiming, DONG Qinghui, YUE Qianjin, WU Feng, YAN Jun and ZHONG Wanxie</b> Feasible Region Study on Main Dimensions of CALM Buoys	3( 281 )
<b>ZHOU Jie, ZHAO Tingting, CHEN Qingqing, WANG Zhiyong and WANG Zhihua</b> Prediction of Concrete Meso-Model Stress-Strain Curves Based on GoogLeNet	3( 290 )
<b>LI Liping, TANG Lei, PAN Yishan, TAI Yinglou and ZHANG Haitao</b> Ultralow Friction Whipping Effects of Sandstone Blocks Based on FLAC-3D	3( 300 )
<b>MA Ming, LI Mingdong, LANG Chaopeng, ZHANG Jingwu and WAN Yukuai</b> Numerical Solutions of the Nonlimit-State Active Earth Pressure Under Backfill Wall Rotation Around the Bottom	3( 312 )
<b>SHI Xiaobo and GAO Ying</b> Properties of Quasiconvex Functions and Their Applications in Multiobjective Optimization Problems	3( 322 )
<b>XIAO Wenke and CHEN Xingding</b> A Modified Multi-Splitting Iterative Method With the Restarted GMRES to Solve the PageRank Problem	3( 330 )
<b>LIU Mian, CHENG Hao and SHI Chengxin</b> Variational Regularization of the Inverse Problem of a Class of Nonlinear Time-Fractional Diffusion Equations	3( 341 )

**OUYANG Baiping**

Nonexistence of Global Solutions to Semilinear Moore-Gibson-Thompson Equations With Space-Dependent Coefficients and Source Terms 3( 353 )

**XU Xiaojian and DENG Zichen**

Boundary Value Problems of a Kirchhoff Type Plate Model Based on the Simplified Strain Gradient Elasticity and the Application 4( 363 )

**HU Qiping, CHEN Zhe and ZHOU Juan**

Research on Shear Lag Warping Displacement Modes of Frame-Tube Structures Based on the Hamiltonian Mechanics 4( 374 )

**GE Renyu, ZHANG Jiachen, MA Guoqiang, LIU Xiaoshuang and NIU Zhongrong**

Analysis on Stress Singularity of Plane Joints With the Differential Quadrature Method 4( 382 )

**ZENG Weihong, FU Zhuojia and TANG Zhuochao**

A Novel Localized Meshless Collocation Method for Numerical Simulation of Flume Dynamic Characteristics 4( 392 )

**MAO Liangjie, ZHANG Xiaocheng, XUE Jibiao, ZHAN Ning and LIU Jun**

Research on Calculation of Riser Gas Injection Dual-Gradient Drilling Wellbore Parameters 4( 401 )

**WANG Xiaoxia**

Uniform Asymptoticity of the Solution to the 2D  $g$ -Navier-Stokes Equation With Nonlinear Damping 4( 416 )

**JI Anzhao, WANG Yufeng and ZHANG Guangsheng**

A Green's Function Construction Method of the Single Well Seepage Model for Asymmetric Fractures 4( 424 )

**YAN Qinling and TANG Sanyi**

Dynamic Changes of Influenza A/H1N1 Epidemic Evaluated Based on the Kolmogorov Forward Equation 4( 435 )

**LI Yazhi and LIU Lili**

Study of the Optimal Integrated Control of a Dengue Transmission Model 4( 445 )

**CHEN Qianjun, JIANG Yuan, LIU Zijian and TAN Yuanshun**

Dynamic Behavior of a Stochastic Predator Prey Model With the Gilpin-Ayala Growth 4( 453 )

**SHEN Xuhui**

Lower Bounds for Blow-Up Time of Reaction-Diffusion Equations With Gradient Terms and Nonlocal Terms 4( 469 )

**PENG Shibin, GUO Rui, FENG Shangsheng and JIN Feng**

A Calculation Model for Temperature Responses of Active Cooling Lattice Sandwich Structures for Thermal Protection 5( 477 )

**LIU Xin, WU Qianqian, YU Guocai and WU Linzhi**

Three-Point Bending Properties of Carbon Fiber Reinforced Polymer Composite Honeycomb Sandwich Structures With Curved Wall 5( 490 )

**GUO Fan, YANG Cao, GUO Rui and JIANG Wei**

Enhancement Strategies for Mechanical Robustness of Carbon Aerogels and Their Applications 5( 499 )

**DENG Jian, XIAO Pengcheng, WANG Zengxian, SHAO Guangran and LU Tianjian**

Interlaminar Crack Propagation Analysis of ENF Specimens Based on the Cohesive Zone Model 5( 515 )

**LIN Zhen and WU Jiuhui**

The Low-Frequency Broadband Mechanism of Nonlinear Elastic Metamaterials With Gaps 5( 524 )

**YANG Hang and MA Li**

Multimaterial Lattice Structures With Thermally Programmable Mechanical Behaviors 5( 534 )

**ZHANG Jie, ZHANG Sai, GAO Weiye, HU Shiwang and WANG Zhenyi**

A Fractal Model for Thermal Dispersion Coefficients of Porous Media 5( 553 )

**GAO Weiye, ZHANG Sai, ZHANG Jie, HU Shiwang and WANG Zhenyi**

Thermo-Mass Coupling Fractal Study of Wet Phase-Change Rough Porous Materials 5( 561 )

**DU Zhipeng, ZHANG Lei, CHEN Yong and HUA Hongxing**Reduced-Scale Experiment Study on the Protective Mechanism of Foam Coating Against Underwater Explosion  
Bubble Jet 5( 569 )**YAN Hao, DAI Huliang, WANG Lin and NI Qiao**

A Study on the Vortex-Induced Vibration Mechanism of Cantilever Cylinders Under Gas-Liquid Cross Flows 5( 577 )

**WANG Qi, ZHU Yinxin, NIU Peixing and LIU Shaobao**

Simulation of Aerodynamic Performances of Flexible Flapping Wing Airfoils 5( 586 )

**QI Zihan, WU Zhiqiang, JIAO Yunlei and JIA Wenwen**

Beat Vibration of X-Configuration Tension Nonlinear Systems Under Resonance Excitation 6( 597 )

**ZHANG Shangyuan, NIE Yufeng and LI Yiqiang**

The RBF-PU Method for Solving 2D Nonlocal Diffusion and Peridynamic Equations 6( 608 )

**SHI Meijiao, XU Huidong and ZHANG Jianwen**

Non-Smooth Grazing Dynamics for Cantilever Beams With Bilateral Elastic Constraints 6( 619 )

**DING Jieying, XUE Feng and GOU Xiaofan**A Study on Interfacial Fracture Behaviors of Superconducting Thin Film/Substrate Structures on Taking  
the Account of Effects of Flux Flow 6( 631 )**ZHANG Bingcai, DING Shenghu and ZHANG Laiping**The Anti-Plane Problem of Collinear Interface Cracks Emanating From a Circular Hole in 1D Hexagonal  
Quasicrystal Bi-Material 6( 639 )**ZHANG Dongdong, LUAN Fuqiang, ZHAO Lihui and ZHENG Ling**

Research on Topology Optimization of Damping Material Microstructures With Varied Volume Constraints 6( 648 )

**ZHOU Baoliang, LI Zhiyuan and HUANG Dan**

PDDO Analysis of 2D Transient Heat Conduction Problems 6( 660 )

**LI Jing, SUN Guiquan and JIN Zhen**

Effects of Intraspecific Competition Delay on Vegetation Periodic Oscillation Patterns 6( 669 )

**FENG Xinyi and SUN Xiangkai**Characterizations of Approximate Optimality Conditions for Fractional Semi-Infinite Optimization Problems  
With Uncertainty 6( 682 )**CAO Xiaochun, JING Wenjun and JIN Zhen**

Dynamic Analysis of the Network Epidemic Model Based on White Noise 6( 690 )

**CHEN Hongling and LI Xiaolin**

Analysis of the Finite Point Method for Fractional Cable Equations 6( 700 )

**LI Liang , SHI Ruifang and LIN Jianzhong**

Research on Deposition and Orientation Characteristics of Cylindrical Particles in Gas-Solid 2-Phase

Turbulent Flow in Curved Tubes

7( 707 )

**YUAN Jiarui, DING Hu and CHEN Liqun**

Analysis and Simulation of Natural Frequencies of Slightly Curved Pipes

7( 719 )

**LI Yingxue, WANG Haoyuan and LOU Qin**

Mesosopic Numerical Study on Flow Boiling Heat Transfer Performance in Channels With Multiple

Rectangular Heaters

7( 727 )

**XUE Jianghong, HE Zanhang, XIA Fei, LI Zerong, JIN Fusong and YANG Peng**

Size-Dependent Effects of Micro-Nano Mindlin Plates Based on the Couple Stress Theory

7( 740 )

**XU Hua, CAO Zheng, ZOU Yunpeng and YANG Lüfeng**

Williams Elements With Generalized Degrees of Freedom for Crack Tip SIFs Analysis Under Crack Surface

Distributed Loading

7( 752 )

**WU Yucheng, YIN Hong and PENG Zhenrui**

Stochastic Model Updating Based on Kriging Model and Lifting Wavelet Transform

7( 761 )

**CHEN Haiyu and XU Fuwei**

Prediction of the Macroscopic Mechanics Properties of Recycled Aggregate Concrete Based on the

Mesosopic Equivalence Theory

7( 772 )

**ZHENG Liying, YANG Yongqing and XU Xianyun**

Sampling Consensus of 2nd-Order Multi-Agent Systems Based on Time-Varying Topology

7( 783 )

**LUO Meiling, LI Gaoxi, HUANG Yingquan and LIU Liying**

SQP Methods for Mathematical Programs With Switching Constraints

7( 792 )

**WANG Yahui**

An Improved 3rd-Order WENO Scheme Based on a New Reference Smoothness Indicator

7( 802 )

**LI Yuanfei**

Global Existence of Solutions and Lower Bound Estimate of Blow-Up Time for the Keller-Segel Chemotaxis

Model

7( 816 )

**LU Lian, REN Weixin and WANG Shidong**

Structural Instantaneous Frequency Identification Based on the Fractional Fourier Transform

8( 825 )

**WANG Qisheng, JIANG Jianping, LI Qingjun, JIANG Guoqi and DENG Zichen**

Dynamic Analyses of the Assembling Process of Ultra-Large Structures With Space Robots

8( 835 )

**DONG Fangfang, YU Bin, ZHAO Xiaomin and CHEN Shan**

Dynamic Modeling of Spatial Cooperation Between Dual-Arm Mobile Manipulators

8( 846 )

**ZHANG Yuhang, LIU Wenguang, LIU Chao and LÜ Zhipeng**

Effects of Cone Angles on Nonlinear Vibration Responses of Functionally Graded Shells

8( 857 )

**GUO Peng, TANG Rongan, SUN Xiaowei, HONG Xueren and SHI Yuren**

Explicit Exact Solutions to the Wave Equation for Nonlinear Elastic Rods

8( 869 )

**CUI Chunli and XU Yaoling**

The Interface Model and the Interphase Model for Predicting the Effective Elastic Properties of Nano-Fiber

Composites	8( 877 )
<b>MA Yongbin and LI Dongsheng</b>	
Magneto-Thermoelastic Coupling Dynamic Responses of Narrow Long Thin Plates Under Memory Effects and Size Effects	8( 888 )
<b>SUN Fengqi</b>	
State Feedback Generalized $H_2$ Control of Continuous Integrated Control Systems	8( 901 )
<b>LIU Feiyang and LI Bing</b>	
Event-Based State Estimation of Complex-Valued Neural Networks With Mixed Delays	8( 911 )
<b>ZHOU Yanping, WANG Xun and BIE Qunyi</b>	
Global Well-Posedness of the Mild Solutions to the Boussinesq Equations	8( 920 )
<b>WANG Xiaoting, LONG Xianjun and PENG Zaiyun</b>	
A Double Projection Algorithm for Solving Non-Monotone Variational Inequalities	8( 927 )
<b>ZHAO Ke, CHEN Changyi, XI Yanyan, HUANG Dongwei, WU Feng and ZHONG Wanxie</b>	
The Coupling State Equations and the Symplectic Algorithm for Control Rod Drop and Fluid Flow	9( 935 )
<b>LIU Huimin and PU Xueke</b>	
Modulation Approximation of a 2-Fluid System in Plasma	9( 944 )
<b>RAO Kai, XIE Zhihui, GUAN Xiaonan, MENG Fankai and GE Yanlin</b>	
Geometry Design of Square Column Heating Devices in Jet Channels	9( 955 )
<b>ZHU Shuairun, LI Shaohong, ZHONG Caiyin and WU Lizhou</b>	
Numerical Analysis of Time Fractional-Order Unsaturated Flow and Its Application	9( 966 )
<b>PENG Mengyao, GU Shuitao, ZHOU Yangjing, WANG Shimeng and FENG Zhiqiang</b>	
Development and Application of Fatigue Life Evaluation Software LtsFatigue Based on LiToSim	9( 976 )
<b>ZHUO Yingpeng, WANG Gang, QI Zhaohui and ZHANG Jian</b>	
A Spatial Geometric Nonlinearity Spline Beam Element With Nodal Parameters Containing Strains	9( 987 )
<b>PAN Xianyun, YU Jianghong and ZHOU Fenglin</b>	
Research on the Dual Reciprocity Boundary Element Method for Non-Homogeneous Elasticity Problems	9( 1004 )
<b>LI Yue, JIANG Rongrong and JIANG Tao</b>	
Numerical Simulation of the Solitary Wave Collision Process in Time Fractional Orders Based on the Coupled Pure Meshless Method	9( 1016 )
<b>WU Kang, LÜ Yibin, SHI Yunlong and WANG Yingzi</b>	
The GMRES(m) Method for Numerical Conformal Mapping of Bounded Multi-Connected Domains	9( 1026 )
<b>LIANG Qing</b>	
Asymptotic Properties of the Solutions to a Class of Perturbed Stochastic Impulsive Functional Differential Equations	9( 1034 )
<b>CAO Yanhua, ZHANG Zitong and LI Nan</b>	
A Space-Time Polynomial Collocation Method for Solving 3D Burgers Equations	9( 1045 )
<b>QI Jin and WU Chuijie</b>	
Construction of Spatiotemporal-Coupling Optimal Low-Dimensional Dynamical Systems for Compressible Navier-Stokes Equations	10( 1053 )

<b>HE Xiaoqiu, XIONG Yongliang, XU Shun, PENG Zerui and CHEN Bo</b>	
Numerical Simulation of the Quasi-2D Turbulence on a Half Soap Bubble Heated at the Bottom	10(1086)
<b>WANG Qiang, XU Tao and YAO Yongtao</b>	
Numerical Study on Hypersonic Flow and Aerodynamic Heating	10(1105)
<b>TAO Ran, ZHOU Huanlin, MENG Zeng and YANG Xiaomeng</b>	
Optimization Design of Holding Poles Based on the Response Surface Methodology and the Improved Arithmetic Optimization Algorithm	10(1113)
<b>LI Qing and CHEN Shenshen</b>	
Free Vibration Analysis of Laminated Composite Plates Based on the Reconstructed Edge-Based Smoothing DSG Method	10(1123)
<b>LEI Jian, XIE Yuyang, YAO Mingge and HE Yuming</b>	
Vibration and Buckling Characteristics of 2D Functionally Graded Microbeams With Variable Cross Sections	10(1133)
<b>PENG Xulong, HUANG Haiping, LI Jinbao, CHEN Yang and CHEN Ziguang</b>	
Elastic Analysis of Anisotropic Functionally Graded Rotating Disks With Non-Uniform Thicknesses	10(1146)
<b>CHEN Yan</b>	
Propagation Dynamics of a Discrete SIS Model With Time Periodicity	10(1155)
<b>SONG Xue, YANG Yunrui and YANG Lu</b>	
Periodic Traveling Wave Solutions of Time-Periodic SIR Epidemic Models With External Supplies	10(1164)
<b>TIAN Ya, QIN Yao and XIANG Jing</b>	
Blow-Up Behaviors of Solutions to Reaction-Diffusion Equations With Nonlocal Sources and Variable Exponents	10(1177)
<b>LIU Jingjing and SUN Yuhuai</b>	
New Exact Solutions to a Class of Fractional-Order Modified Unstable Schrödinger Equations	10(1185)
<b>HUANG Qin, YU Lingfeng and CHEN Kai</b>	
Design of the Battery Thermal Management System With Phase Change Material Coupled Cold Plates	11(1195)
<b>ZHANG Xinchun, WANG Junyu, WANG Yulin, HUANG Zixuan, WANG Kai and QIN Jiangyi</b>	
Impact Responses of Prismatic Lithium-Ion Battery Based on the Membrane Factor Method	11(1203)
<b>YAN Haoyuan, ZHAO Tianyang, LIU Xiaochuan and DING Zhaohao</b>	
Modeling of Electric Vehicles as Mobile Energy Storage Systems Considering Multiple Congestions	11(1214)
<b>HAO Junhong, WU Xuefeng, ZHANG Shining, TIAN Liang and GE Zhihua</b>	
Normalized Dynamic Characterization and Application of Multiple Heat Storage Materials Based on Standard Thermal Resistance	11(1227)
<b>HUANG He, GAO Jiaxu, REN Zhibin and ZHAO Ming</b>	
Topology Optimization of Fins for Rapid Heat Storage and Release in Triangular-Inside Tube Units	11(1238)
<b>YANG Xiaohu, LI Shaodan and CHEN Kai</b>	
Improved Quasi-Steady-State Approximation Analysis of Stefan Problems Under 2nd-Kind Boundary Conditions	11(1249)
<b>YANG Guoxin, ZHENG Shifeng, LI Dingyu and LI Weiguo</b>	
Thermal Shock Crack Propagation of Alumina Simulated With the Phase-Field Method Under Temperature-Dependent Damage Criteria	11(1259)

<b>MAO Xiaomin, ZHANG Huihua, JI Xiaolei and HAN Shangyu</b>	
Intelligent Crack Recognition Based on XFEM and GA-BP Neural Networks	11(1268)
<b>WANG Lan, DONG Yiping and CAO Jinde</b>	
Switching Control of Nonlinear Systems Based on the Quasi-ARX Model and the SVR Algorithm	11(1281)
<b>LIU Yangxiu and HU Yanxia</b>	
Exact Solutions to Space-Time Fractional Fokas-Lenells Equations With Parameters	11(1288)
<b>CUI Jianxuan, SHI Chengxin, LIU Mian and CHENG Hao</b>	
Source Identification for the Time-Fractional Diffusion Equation With Robin Boundary Conditions	11(1303)
<b>DU Chen and PENG Xiongqi</b>	
Lamination Design Optimization for Continuous Fiber Reinforced Composites of Variable Thicknesses	12(1313)
<b>YANG Qihang, LI Lin'an, LI Liqing and MI Shaoxuan</b>	
Structural Crack Identification Based on the Variational Mode Decomposition	12(1324)
<b>ZHANG Jie, LI Xinying, YANG Zongkai and DA Hu</b>	
Effects of Time Delay on Bifurcation and Synchronization of Flux-Coupled and Chemically Coupled Neurons	12(1336)
<b>LI Xu, SU Rui, ZHANG Huan, WENG Qianru and JIANG Xiaoyu</b>	
Influence of Multiple Micro Cracks on the Damage Behavior of a Macro-Crack Tip	12(1347)
<b>LI Shan and LI Ye</b>	
Wave Surface Identification Based on Stereo Vision and Wave Theory: an Initial Attempt	12(1359)
<b>KONG Xiangwei, LIU Zuocai and JIN Yanxin</b>	
Study on Multiphase Pressure Wave Velocity Characteristics of Automatic Kill Annulus in Chuanyu Fractured Formation	12(1370)
<b>ZHUANG Xin, LIU Fujun, SUN Yanping and WANG Huiling</b>	
High Accuracy Numerical Simulation of Non-Isothermal Viscoelastic Polymer Fluid Past a Cylinder	12(1380)
<b>ZHAO Lizhi and FENG Xiaoli</b>	
The Inverse Source Problem for a Class of Stochastic Convection-Diffusion Equations	12(1392)
<b>GONG Chikun, RU Qingyang and YUAN Lipeng</b>	
Adaptive Constrained Control of Unknown Strict Feedback Nonlinear Systems With Dead Zone Input	12(1402)
<b>QIAO Xinzhou, CHEN Yongjing, LIU Peng and FANG Xiurong</b>	
Non-Probabilistic Structural Reliability Analysis Integrating the PSO and the Kriging Model	12(1412)
<b>SHEN Shilei and SONG Chuanjing</b>	
Noether's Theorem for Constrained Hamiltonian System Under Generalized Operators	12(1422)
