

APPLIED MATHEMATICS AND MECHANICS

Vol.45 2024

INDEX

SUN Jialiang, ZHANG Xiaoliang and JIN Dongping Separation and Reconfiguration Dynamics of Stacked Satellites	1(1)
ZHOU Rui, ZHANG Zhijia, ZHANG Wang, ZHANG Qiancheng, WEI Xin, SUI Yaguang, WANG Jianqiang and JIN Feng Dynamic Response and Energy Absorption Performances of Multi-Walled Tube Reinforced Aluminum Foam Structure	1(12)
HAN Shaoyan and GAO Ruxin A Wave Finite Element Method for Free Vibration Analysis of Lattice Core Sandwich Cylindrical Shells	1(25)
LI Jinkuang, WAN Wenyu and LIU Chuang Study on Impact Resistance of Shape Memory Alloy Honeycomb Structures	1(34)
ZHOU Sili, SUN Gang and WANG Cong Application Study on the DDPG Method for Designing Variable Camber Airfoils/Wings Under Buffeting Constraints	1(45)
XIE Chuan, XU Chao, ZHOU Danfa and YAO Weixing The Perturbation Neural Network Surrogate Model Method for Size-Topology Synthetical Optimization of Wing Rib Trailing Edges With Flap Tracks	1(61)
ZHOU Chongwei, ZHAO Qinghai, CHEN Jianliang and SHI Gaosong Topology Optimization of Heat Transfer Structures Under Gaussian Moving Heat Source Transient Effects	1(72)
PAN Hanting, XU Duo, XU Hongtao and LUO Zhuqing Numerical Analysis on Thermal Performances of Metal Foam Composite Phase Change Materials Under Cavity Effects	1(85)
DING Hongyi, WANG Zhiyun, ZHAO Jingshuai, WANG Nan and LOU Qin The 2-Phase Lattice Boltzmann Simulation of Flow-Following Bubble Movement Through Microchannels in Orifice Plates	1(97)
WU Xueke, LIU Chunyan, BAI Yu and ZHANG Yan Stretching Flow and Magnetic Diffusion Analysis of Maxwell Magnetic Nanofluids in Non-Uniform Magnetic Fields	1(110)
LIU Nan and SONG Jian Stable Radiation Baroclinic Potential Vortices Under Basic Flow Zonal Shear	1(120)
FAN Yajie, LI Yan, LI Zhongpan, CHEN Huijian and FENG Zhiqiang Smoothed Finite Element Analysis of Contact and Large Deformation Problems	2(127)
YANG Zhenting, WANG Yajing, NIE Xueyang, XU Xinsheng and ZHOU Zhenhuan Symplectic Isogeometric Analysis Coupling Method for Interfacial Fracture of Piezoelectric Quasicrystal Composites With Notches	2(144)
ZHANG Guangjiang, YANG Deze and CHU Xihua Study on Constitutive Relations and Boundary Value Problems of Granular Materials Based on Artificial Neural Networks	2(155)
FAN Zhigeng, WAN Qiang, NIU Hongpan and JIN Fan A Nonlinear Viscoelastic Model for Silicon Rubber Foam Cushion Considering Time-Varying Evolution Characteristics	2(167)

LI Shuguang and QU Kai	
Homogenization Modeling of Single-Phase Gas Local Flow in Porous Media	2(175)
JI Haibo, WANG Xin, SU Jinbo, LI Zhen, WANG Pengfei, JU Yuanyuan and LU Tianjian	
Synergistic Effects of Impact and Attack Angles on Anti-Penetration Performances of Thin Aramid Laminates	2(184)
WANG Xinte, LIU Juan, HU Biao, ZHANG Bo and SHEN Huoming	
Wave Propagation in Functionally Graded Piezoelectric Nanoshells	2(197)
YUAN Qingdan and GUO Junhong	
Nonlocal Vibration, Buckling and Bending of 1D Layered Quasicrystal Nanobeams	2(208)
MA Jinwei and DUAN Qinglin	
Nearly Incompressible Elasto-Plastic Analysis of Extra-DOF-Free Generalized Finite Elements	2(220)
HAN Lifu and LIU Tiejun	
The 2D Adhesive Contact of the Functionally Graded Piezoelectric Coating Under a Conducting Indenter	2(227)
ZHAO Xin and LÜ Yibin	
Numerical Conformal Mappings From Multiply Connected Regions Onto Annular Domains With Slits	2(245)
XU Lei, ZHANG Weisheng, ZHU Bao and GUO Xu	
Data-Driven Sound Quality Optimization of Acoustic Devices	3(253)
XU Wanyin, XIE Yu and QIAN Jin	
Adhesive Performances of 3D Printed Biomimetic Mussel Byssal Structures	3(261)
YANG Guojun, LÜ Minghang, TANG Guangwu, TIAN Qiwei and DU Yongfeng	
Study on Bearing Capacities and Failure Stages of Tunnel-Type Anchorage Considering Different Failure Modes	3(273)
HUANG Wenxiong and CUI Xian	
Mathematical Description and Complete Solution of the Critical State in the Shear Band of Granular Soil	3(287)
AN Ruimei, HOU Yongkang, LI Yunfeng and DUAN Shujin	
On Energy Release Rates and Fracture Energy of Elastic Bodies With Cohesive Cracks	3(295)
ZHAO Xuefen, LU Shaonan, MA Yuanyuan and ZHANG Baowen	
The Plane Thermoelastic Problem of a Central Opening Crack in the 1D Hexagonal Quasicrystal Non-Periodic Plane	3(303)
QI Jin and WU Chuijie	
LMS Method: a Spatiotemporal Optimal Low-Dimensional Dynamical Systems of Multi-Scale Numerical Simulation Method for Compressible Turbulence	3(318)
CUI Jing, YUE Maochang, NIU Shuxin and YANG Guangfeng	
Numerical Study on Dynamic Behavior Characteristics of Water Droplets Hitting Inclined Non-Newtonian Deicing Liquid Films	3(337)
HE Shu and LOU Qin	
Simulation Study of Porosity Effects of Porous Media on Pool Boiling Heat Transfer Performances	3(348)
QI Wenchao, WANG Qiongyao, PING Kai and CHEN Xiner	
Study of Inhibitory Effects of Elastic Membranes on Liquid Sloshing in Partially Filled Tank Vehicles	3(365)
LIU Min, LIU Xiang, FENG Zhiqiang and GU Shuitao	
Software Development for Stand Seam Roof Systems Based on the LiToSim Platform	4(379)
QIU Shasha, LIU Xingze, NING Wenjie, YAO Weian and DUAN Qinglin	
A Three-Dimensional Adaptive Finite Element Method for Phase-Field Models of Fracture	4(391)
WANG Huiping, WANG Guixia and CHEN Decai	
Boundary Element Analysis for the Plane Elasticity Problems of Finite Icosahedral Quasicrystal Plates Containing Elliptical Holes	4(400)

YANG Guojun, TIAN Li, TANG Guangwu, MAO Jianbo and DU Yongfeng Research on Bridge Performance Degradation Prediction Based on Combination of the D-S Theory and the Markov Chain	4(416)
YAO Hao, XIA Guiran, LIU Zejia and ZHOU Licheng A Defect Identification Method for Bonding Layers of Adhesive Steel Members Based on Machine Learning	4(429)
PENG Yi, ZHANG Zhengqi, LI Qiang and YANG Guangwei A Random Forest Evaluation Model for Pavement Skid Resistance Based on Comprehensive Fractal	4(443)
QIAO Xinzhou, ZHAO Yuetong, FANG Xiurong and LIU Peng Non-Probabilistic Reliability Indexes Based on the Generalized Super Ellipsoid Model	4(458)
SHUAI Xin and NI Mingkang A Class of Right-Hand Discontinuous Singularly Perturbed Boundary Value Problems With Turning Points	4(470)
WANG Chunyuan, LI Hong and HE Siriguleng A Continuous Space-Time Mixed Finite Element Method for Sine-Gordon Equations	4(490)
CAO Qi and FENG Min Higher-Order KKT Sufficient Optimality Conditions for Nonsmooth Semi-Infinite Multiobjective Optimization	4(502)
LU Tianjian The Greatness of a University Lies in Its Excellence	5(509)
YUAN Quan and YUAN Si Analogic Analysis of Orthotropic Plate Bending Problems With Gridwork Systems	5(518)
YANG Xiaomeng, LI Liang, HU Xiongfei and ZHOU Huanlin Structure Optimization of Holding Poles Based on the Improved Sine Cosine Algorithm	5(529)
CHEN Wei, TANG Zhihong and PENG Linxin Linear Bending Analysis of Functionally Graded Sandwich Shells With the Meshless Method Based on the Layer-Wise Theory	5(539)
LIU Yifan, MA Xiaomin, WANG Zhiyong and WANG Zhihua Analytical Solution of the Concrete Homogenization Method Based on the ANN	5(554)
SONG Haiyang Structural Parameter Identification Based on the Interval Mathematics Method	5(571)
ZHAO Liju, WANG Shanku, WANG Xiaolin and GE Xinguang Research on Anti-Seismic Performances of Interlayer Isolation Structures With Lateral Stopping Viscoelastic Dampers	5(582)
LI Yong, ZHANG Yingchun, FU Yu, ZHOU Qirun, ZHAO Yufei, YANG Senjie and MA Suxia Experimental Study on Flow and Heat Transfer Characteristics of Ambient Air in NACA0021 and NACA4822 Airfoil-Fin Channels	5(594)
NI Yunlin, ZHANG Xijiang, YU Jiangmei and SHEN Liangduo Finite Difference Solution of the Modified Mild Slope Equation for Wave Reflection by a Slope With Superimposed Undulating Seabed	5(606)
CHANG Long, BUREN Mandula, SUN Yanjun and JIAN Yongjun Periodic Electroosmotic Flow of the Jeffrey Fluid in Microchannel Between Two Sinusoidally Wavy Walls	5(622)
SHEN Yang, WANG Qikun and LIU Tangjing Effect of Shear Thinning Rheological Properties on Particle Migration in Microchannels	5(637)
SUN Xuechao, LIU Shaobao, LIN Min, XU Feng and LU Tianjian The Bio-Thermo-Mechano-Electrophysiology	6(651)

QIN Xuan, SU Lijun, WAN Xiuwei, TAO Ze, SUN Xuechao and LU Tianjian	
A Review of Coupled Thermo-Mechanical Behaviors of Brain Tissue	6(670)
TIAN Jin, LIU Shaobao, LU Tianjian and XU Feng	
Poroeleastic Responses of Human Brain Under Sustained High Overloads	6(691)
TAO Ze, SU Lijun and LIU Shaobao	
Thermo-Mechanical Analysis of Brain Tissue During Freezing	6(710)
ZHU Hongyuan, WANG Yushuai and LIN Min	
The Mechanochemical Coupling Mechanism of Matrix Stiffnesses and Growth Factors Driving the Epithelial-Mesenchymal Transition	6(719)
LIU Yonggang and SU Lijun	
Responses of Ureteral Pain Caused by Small-Sized Kidney Stones Under Fluid-Structure Coupling	6(735)
CAI Wei, ZHOU Zixing, ZHANG Zuoqi and HUANG Guoyou	
Numerical Simulation Study of Wound Remodeling Under Tension Regulation	6(753)
LIU Jinglong, XU Peng, LI Qiao, WANG Lizhen and FAN Yubo	
Effects of Cartilage Endplate Degeneration on Metabolic Transport and Biomechanical Responses of Cervical Intervertebral Discs	6(763)
NI Na, YE Zhipeng, LI Dongbo and ZHAO Dong	
Design and Sensing Theory for Flexible Multi-Layer Equal Strength Beam Force/Displacement Sensors With High Sensitivity	6(775)
LIN Shujuan, GUO Yaohua, QI Bing and LIU Shaobao	
Ultrasonic Mechanotherapeutics	6(787)
JI Heng, TAN Weikang, WU Tongyu, SHU Wenya, WU Xiao, YA Xiaoxu, JI Changchun, WANG Xinjun and HAN Yulong	
The Mechanics Basis of Acupuncture Therapy	6(803)
LIU Panyong, GU Xin and ZHANG Qing	
Peridynamics for Moisture Diffusion and Crack Propagation in Unsaturated Soil Desiccation	7(823)
XU Liuyi, LI Shimin, WANG Shiping, LIU Yunlong and ZHANG Aman	
Investigation of Coupling Effects of Double Bubbles Based on the EFEM and the Unified Bubble Equation	7(835)
DENG Mao, YAN Bo, GAO Yingbo, YANG Hanxu, LÜ Zhongbin, ZHANG Bo and LIU Guanghui	
A Damage Identification Method for Transmission Towers Based on Substructure Model Reduction and Data Driving	7(850)
HUANG Zongzheng, MI Dong, OUYANG Zhigao, HE Xiang, HUANG Xing, ZHOU Wei, JIANG Lanlan and MA Liangying	
Application of the Rate-Dependent Ladeveze Model in Failure Analysis of Composites	7(864)
ZHAO Keke, ZHU Yundie, ZHANG Jiding and JIANG Xiaoyu	
Grain Boundary Slip and a Grain Boundary Triple Junction Crack Nucleation Model for Nanocrystals Under the Influence of Hydrogen	7(875)
WANG Chengyan and LIU Guanting	
The Antiplane Problem of a Lip-Shaped Orifice With 4 Edge Cracks in 1D Hexagonal Piezoelectric Quasicrystal	7(886)
YE Yunong and EBURILITU	
A Symplectic Superposition Method for Vibration of the Orthotropic Rectangular Thin Plate Point-Supported at a Corner and Clamped at its Opposite Edges	7(898)
WU Ziying, ZHU Rongxian, JANG Donggui, CHAO Guoqiang and ZHANG Yuxuan	
Research on Dynamic Characteristics of Serial-Parallel- II Inerter Nonlinear Energy Sink	7(907)

LIU Wei, TONG Xiaolong and JIN Rong An Integration Method With Controllable Numerical Damping Dissipation for Structural Dynamic Equations	7(922)
LI Wenwu and WANG Wei Natural Vibration Frequencies of Laminated Composite Beams Based on the Scaled Boundary Finite Element Method	7(936)
KANG Rui, LI Xue, MENG Han, GAO Jinling, DENG Jian, JIANG Yongfeng, LIN Guoxing and LU Tianjian Ultralight, Compact, and Load-Bearing Multifunctional Metastructures: Concept, Design and Applications	8(949)
YAO Qian, YANG Zhao, WANG Xin, ZHAI Zhi, LI Zhen, GENG Xinyu, LI Bingyang and WANG Pengfei A Review of Design Methods for Mechanical Metastructures	8(974)
DING Yi, WU Weitao, FENG Feng, LI Shulei and YAN Hongbin Topology Review and Convective Heat Transfer Comparison of 3D Lattice Structures	8(1001)
ZHANG Zhiyang, ZHAO Zhenyu, REN Jianwei and GAO Huiyao Study on Impact Resistance of Connection Joints for Honeycomb Sandwich Structures	8(1024)
ZHENG Bingqian, QIANG Lusheng, SONG Xiaotong, NI Changye and ZHANG Rui Load-Bearing and Multi-Point Ballistic Performances of Hybrid Sandwich Meta-Structures	8(1037)
YAO Xiangyu, MA Jianbin, WANG Feiya and YANG Xiaohu Investigation on Mechanical Properties and Temperature Control Efficiency of Novel Load-Bearing and Heat-Storing Metastructure Walls in Hot Summer-Cold Winter Regions	8(1047)
GAO Zhaorui, LI Zheng, JIANG Yongfeng, SHEN Cheng and MENG Han Acoustic Performance Rapid Prediction and Structural Optimization for Resonant Sound-Absorbing Metamaterials Based on Artificial Neural Networks	8(1058)
YANG Shasha, PENG Cong, MENG Han and SHEN Cheng Study on Sound Insulation Characteristics of Thin Plate Acoustic Metamaterials With Flexoelectric Effects	8(1070)
WANG Qinze, HAN Bin, ZHENG Peiyuan, LIU Zhipeng and ZHANG Qi Research on Mechanical Properties of Negative Stiffness Torsion Metastructures	8(1082)
JI Zhengjiang, CHENG Linhao, ZHENG Xitao and YAN Leilei Electromagnetic Wave Dual-Polarized Absorption and Flexural Performance Design of Composite Laminates Based on Carbon Fibers	8(1096)
WANG Xin, LI Zhen, JI Haibo, YANG Hongjun, LI Bingyang and WANG Pengfei Design and Analysis of High Strength and Toughness Bio-Inspired Helicoidal Composite Metastructures	8(1106)
WANG Senlin, LI Jinbao, MA Hongyan and LI Rui Analytical Forced Vibration Solutions of Orthotropic Cantilever Rectangular Thin Plates With the Symplectic Superposition Method	9(1117)
WANG Xiangyu, KE Peng and DU Feng Research on the Dynamic Contact Angle Model for the Droplet Impact Process	9(1133)
WANG Changsheng, YU Chuanze and ZHANG Xiangkui Shell Structure Analysis Based on the Convected Particle Domain Interpolation	9(1147)
ZHANG Jichao, ZHONG Xinyu, CHEN Yiming, SHI Yueqing, GUO Chengjie and LI Rui Hamiltonian System-Based Analytical Solutions to Free Vibration Problems of Functionally Graded Rectangular Plates	9(1157)
TIAN Gengxin, CAO Shenghu and ZHANG Jian Study on Mechanical Properties of Barbed Contact Metamaterials	9(1172)

- ZHAO Bei, XIONG Sijun, CHEN Liang, WANG Chengbo and LI Rui**
A Buckling Analysis Method for Composite Panels in Multiweb Box Structures Based on Elastic Boundaries 9(1182)
- LI Zhen**
Schur Forms and Normal-Nilpotent Decompositions 9(1200)
- MIN Jian, FU Zhuojia and GUO Yuan**
Curriculum-Transfer-Learning-Based Physics-Informed Neural Networks for Simulating Long-Term-Evolution
Convection-Diffusion Behaviors on Curved Surfaces 9(1212)
- ZHAO Liang, LI Yawei, WANG Jianbao, LI Dongdong, DING Shuai and BI Qingjie**
Residual Axial Deformation and Buckling Analysis of Thin-Walled Carbon Fiber Fully Wound Composite Gas
Cylinders 9(1224)
- MA Lan, TIAN Lili and LIU Li**
Stochastic Responses and Stability Analysis of Vibro-Impact Systems With Friction Under Wideband Noise
Excitation 9(1235)
- CUI Youjiang, LIU Chao, CHEN Jiapeng, WANG Biao and WANG Baolin**
Thermo-Electric-Mechanical Coupling Bending Property and Strength Analyses of Thermoelectric Devices
With the Negative Poisson's Ratio Architecture 10(1243)
- WANG Guolin, WEN Jianjun, YUE Yanmei and LIU Jinxi**
Singularities of Coupled Fields in Piezoelectric/Piezomagnetic Composite Wedges; an Antiplane Problem 10(1256)
- LÜ Xin, KE Liaoliang and SU Jie**
An Axisymmetric Contact Problem of Piezoelectric Materials Based on the Couple Stress Theory 10(1268)
- YANG Haozhen, LIU Jinxi, YANG Wanli and HU Yuantai**
Study on Mechanical Modulation of Output Characteristics in Piezoelectric Semiconductor Photovoltaic Cells 10(1279)
- XIAO Zhengguang, ZHANG Chunli and CHEN Weiqiu**
Analysis of Nonlinear Multi-Field Coupling Mechanics of Piezoelectric Semiconductor Beams via PINNs 10(1288)
- ZHAN Chunxiao, LI Xiaobao and WANG Meiqin**
Static Buckling Behaviors of Piezoelectric Semiconductor Beams With Steigmann-Ogden Surface Effects 10(1300)
- GUAN Haoyi, ZHOU Zhihong, LI Yalan, LIANG Ying and TIAN Xiaobao**
Ferroelectric Peak Behaviors of Perovskite Materials Under Ultra-High Pressure 10(1313)
- DONG Yanzhe and LU Xiaoyan**
Design and Multi-State Tunneling Characteristics of Perovskite Ferroelectric Ultrathin Films With Low-Driving
Fields 10(1320)
- JIANG Lijuan, LIU Guanting, GAO Yuanyuan, WANG Ghengyan and GUO Huaimin**
An Antiplane Problem of Magnetoelastoelectroelastic Materials With Nanoscale Lip-Shaped Orifice With 2 Asymmetric
Cracks 10(1332)
- ZENG Jinbao, JIANG Cuixiang and ZHANG Yihao**
Thermal-Mechanical Coupling Damage Analysis of Material Based on PD-FEM Hybrid Model 10(1345)
- LI Tong, QU Jianlong, WANG Wei, WANG Chenlong and XU Xinsheng**
A Hamiltonian System Solution Method for Planar Problems of 2D Quasicrystals 11(1359)
- YAN Xiaoye, LAI Qi, MENG Yao and ZHANG Weisheng**
Explicit Topology Optimization of Multi-Material Active Structures Based on Piezoelectric Actuation 11(1372)
- HAO Yihan, TIAN Xinpeng and DENG Qian**
Interaction Between Flexoelectric Fields Associated With Microholes in Solids 11(1381)
- LIU Yaohua, LI Jun, FENG Xiaoman, MA Jianhua and WANG Binglei**
Study on the Electret Film Crumpling Deformation Theory and Flexoelectric-Like Responses 11(1392)

ZHAO Haoyang, HE Zhuangzhuang and ZHANG Chunli Bending Wave Analysis of Porous Flexoelectric Metamaterial Plates	11(1405)
WANG Xishun, GUO Hao, ZHU Qingfeng, DU Yuehao and MIAO Hongchen A Guided-Wave-Based Method for Detecting Defects in the Adhesive Layer of the Steel-Epoxy-Steel Sandwich Structure	11(1416)
WANG Zihe, MI Zhang and WANG Jie Phase Field Simulation of Dielectric Breakdown in Ferroelectric Composites	11(1428)
GUAN Gaofei, LI Tong, NIE Xueyang, ZHANG Yingrui, XU Xinsheng, SUN Jiabin and ZHOU Zhenhuan A Phase-Field Model for Interfacial Fracture in 2D Quasicrystal Bimaterials	11(1440)
CHEN Liming, ZHANG Liangqi, WANG Xiaoshuang, XIAO Yao and ZENG Zong An Accurate Phase Field Method for 2-Phase Flow With Soluble Surfactants	12(1455)
CHEN Sisi, LI Xulong, ZHANG Chaonan, QIN Juanjuan and ZHAO Bingxin Numerical Simulations of Double-Diffusive Convection in Different Liquid Metals Under Magnetic Fields	12(1473)
LI Hongyang and RAHMATJAN Imin Numerical Simulations of Shock Problems With the Revised KDF-SPH Method	12(1483)
TIAN Rui, CHANG Liang, HAN Tao and NIE Xiaohua The Calculation Method and Application of Fluid-Solid Coupling Vibration Responses of Straight Infusion Pipeline	12(1494)
GAO Xinru, WU Zhiqiang and CHEN Shengli Stochastic Bifurcations of Bi-Stable Van der Pol Systems Under Strong Noise	12(1506)
WANG Deli, YANG Wen, WEI Wei, PEI Haiqing and XU Wei Parameter Optimization Design and Power Response Analysis of Oscillating Buoy Wave Energy Converters With Random Loads	12(1515)
YU Huiting, WANG Yu and HUANG Zaixing Elastocapillary Deformation of Soft Matter Beams on Elastic Substrate	12(1530)
ZHANG Xiaoqing, WANG Jialin, YI Zhijian, ZHANG Tuo and WANG Min 3D Numerical Simulation of Concrete Cracking Based on Specified Stress Method	12(1541)
HE Huan and KOU Lei Analysis of Critical Fracturing Pressure of Splitting Grouting Based on the Cavity Expansion Theory	12(1555)
XI Feng, LI Fang, HU Yachao, TAN Yinghua and WEN Xinyue Strength Evaluation Criteria and Equivalent Plastic Strain for Ideal M-C Materials	12(1567)
YU Songjie, CUI Gaowei and XU Guangying Study on Heat Transfer Models and Mechanisms for Nanosecond Laser Removal of Paint Layers	12(1577)
FU Baolian On Discussion of <i>Discussion on the Modified Reciprocal Theorem of Works</i>	12(1589)
